

# Farm&BuildLink Kawakawa

**November 2022**

At last the ground is drying out a bit, but it's certainly making it challenging in the wet areas getting Fert on & crops in.

Our supply issues are slowly improving with good stocks of timber coming through, although posts & poles are still a struggle. If you've got a fencing project coming up, getting materials ordered & on hand early is probably a good move.

**Glyphosate Price heading down!**  
**G360 20L now \$330**
